

Waste Management steps including:

- **Solid waste management**
- **Liquid waste management**
- **E-waste management**

Response:**Solid Waste Management**

Unused bottles and kitchen waste are disposed of at a nearby exterior source. Waste papers, worksheets, newsprint, and other materials are disposed of through ITC Global Pvt Ltd, a global waste recycling organization, in accordance with a memorandum of understanding (MOU) made by KVCET and ITC. (supporting doc – ITC MoU doc to be attached)

Liquid Waste Management

Recycling of wastewater has been undertaken to reuse the water from bathrooms and kitchen cleaning areas for gardening purposes. Biomedical liquid waste management is carried out through STTP.

e-Waste Management

Certain amount of functional electronic devices, such as personal computers and accessories, are used to demonstrate technology to school students. E-waste disposal organizations and vendors handle the disposal of obsolete computer hardware, accessories, and other electronic objects.
